EMPLOYMENT HISTORY

DXC Technology

ANALYST - II (INFRASTRUCTURE SERVICES), SEPT 2022 - DEC 2023

- Implemented continuous monitoring procedures for mainframe environments, ensuring real-time oversight and operational integrity.
- Proactively detected and resolved issues, minimizing downtime and maintaining uninterrupted services.
- Played a key role in sustaining seamless functionality through strategic problem-solving and preventative measures.

Equinix

SOFTWARE DEVELOPER (INTERNSHIP), JULY 2021 - APRIL 2022

- Architected and developed a sophisticated web application leveraging JavaScript, ReactJS, and NodeJS, ensuring high performance and scalability.
- Played a pivotal role in designing and implementing robust cloud architecture solutions, enhancing multi-cloud connectivity and operational efficiency.
- Demonstrated versatility and adaptability by managing a wide array of tasks, consistently delivering high-quality results under direct supervision.

AGV Systems Pvt. Ltd.

SOFTWARE DEVELOPER (INTERNSHIP), MAY 2021 - JULY 2022

- Contributed to the development of a project utilizing Matlab, enhancing overall project functionality.
- Played a key role as a programmer, focusing on specific project components and ensuring their successful implementation.
- Conducted in-depth research on various radar systems and related case studies, gaining valuable insights and contributing to project knowledge base.

ACADEMIC HISTORY

Mukesh Patel School of Technology Management & Engineering, Mumbai

B.TECH IN ELECTRONICS & TELECOMMUNICATIONS, 2018 - 2022

- Achieved a Grade Point Average (GPA) of 2.9/4.0.
- Gained comprehensive knowledge in electronics and telecommunications, with a strong foundation in both theoretical concepts and practical applications.
- Engaged in various projects and research activities, honing skills in problem-solving, teamwork, and technical innovation.
- Actively participated in extracurricular activities and technical clubs, contributing to a well-rounded academic experience.

PROJECTS

FORKIFY | JavaScript | April 2022

- Created an advanced web application in JavaScript, functioning as an extensive recipe handbook.
- Enables users to browse recipes with detailed ingredient lists, create personalized recipes, and adjust ingredient quantities based on the number of servings.

EQUINIX PORTAL | MERN Stack | January 2022

- Developed a customer service web portal using ReactJS within the MERN stack framework.
- Provided user-friendly features, including the ability to change cloud service providers and add additional connections.

MAPT Y | JavaScript | March 2022

- Engineered an advanced web application for tracking and managing sports activities and workouts, featuring sophisticated location tracking and journey duration analytics.
- Developed with a focus on optimal performance using JavaScript.
